Proposed implementing rules
and administrative-technical specifications

V1.2.6 (Oct 30, 2026)
Adrian STAN, RC Pitești, D2241

Chapter 0 - General provisions

Art. 0.1 - Purpose. This document proposes implementing rules for the RotaKids framework proposed by Resolution 26R-11: the allocation of responsibilities, data management, operating procedures and the specifications of the digital platform. It also answers questions raised by Rotarians from several districts after the resolution package was published.

Art. 0.2 - Relationship with documents 01-10. This document complements documents 01-10 (*01. Standard Constitution, 02. Standard Bylaws, 03. Statement of Policy, 04. Sponsor Guide, 05. Global Handbook, 06. Branding & Merit Guide, 07. Safeguarding Framework, 08. Position Paper, 09. Visual Guide - Annex A, 10. Project Showcase - Annex B*). Where a provision of this document differs from an earlier document, an amendment of the earlier document is proposed; the proposed amendments are listed in Chapter 12.

Art. 0.3 - Application. The proposed rules would apply after the adoption of the resolution and the decision of the RI Board, for the duration of the 3-year pilot proposed in Chapter 10. The provisions are worded normatively for clarity, but all of them are proposals and may be amended by the RI Board or by districts, within their respective responsibilities.

Art. 0.4 - Definitions.

Term	Meaning
Platform	The set of RotaKids digital services: *my.rotakids.org* (administration), *rotakids.club* (club websites), *rotakids.net* (registry and map), *rotakids.org* (documentation and certificate verification), *rotakids.com* (project support).
District instance	The space in *my.rotakids.org* that belongs to a district and holds its data.
Data controller	The district, for the data in its instance.
Data processor	The entity that technically operates the platform on behalf of the districts. In the proposed pilot: District 2241.

Term	Meaning
Responsible adult	The Rotarian Advisor or Faculty Advisor of a RotaKids club, with a validated account.
Alias	The code **RK-XXXXX** assigned to a child on enrollment; the child's only identifier on the platform.
Local file	The club's physical file, kept at the school or at the sponsor club, containing the children's names, the parental consent forms and the name-alias correspondence.
Update window	The period from May 1 to July 31 of each Rotary year.
Club ID	The club's unique number on the platform; it is assigned once and never reused.

Chapter 1 - Allocation of responsibilities

Art. 1.1 - Levels. Responsibilities are proposed to be allocated on three levels: RI, the district and the club. RI sets the minimum; the district may impose stricter rules, never more lenient ones. This allocation follows the original model of the program (Florida, 2000), in which clubs operated in schools, with an advisor from the school and a Rotary liaison, while the district supplied the materials.

Art. 1.2 - Table of responsibilities.

Responsibility	Holder	Rationale
Ownership of the RotaKids mark	RI	The proposed logo contains Rotary Marks. Origin of the program: the first RotaKids club was founded in September 2000 at Jensen Beach Elementary (Florida) by Rotarian Jane Mills, sponsored by the Rotary Club of Stuart (District 6930). The original emblem (the heritage logo) was designed by Steve Hall (Rotary Club of Merritt Island, D6930), and the Pledge comes from the same founding club. RIBI developed the program at scale and created the "RotaKids Pack" (*The RotaKids Handbook, Pledge Cards, RIBI Charter Certificate, RIBI Presidents Citation*). The original model was already district-based:

Responsibility	Holder	Rationale
		badges and T-shirts were distributed by the District RotaKids Chairman (RotaKids brochure, D6930).
Use of the mark	Clubs chartered in a participating district	In accordance with RI brand rules.
Approval of the core documents (logo, Statement of Policy, standard constitution and bylaws)	RI, once	Ensures the consistency of the program.
Approval of local adaptations and translations	The district	Law and language differ between countries.
Templates for the certificates listed in Annex A, §7, for the badge and for the parental consent form	The district, after RotaKids is recognized	The templates are established after RotaKids is recognized by the RI Board, in accordance with *Annex A* (Document 06, §3; Global Handbook, §11). The parental consent form is adapted to national law.
Guides (Global Handbook, Sponsor Guide)	The district may adapt them	They are reference material.
Admission of a district to the program	The district, by appointing a District RotaKids Chair and a Youth Protection Officer	Without these two office holders there can be no district accountability.
Chartering a club	The sponsoring Rotary club (board decision), certified by the District Governor or the District RotaKids Chair	Standard Constitution, Art. 3.4.
Validation of adult accounts	District RotaKids Chair	The district is responsible for vetting adults. In multinational districts, validation is carried out by the national coordinator of each country (Art. 8.3).
Withdrawal of a club's authorization	The District Governor	Standard Constitution, Art. 3.4.

Responsibility	Holder	Rationale
Suspension of a district	The RI General Secretary	The model of Rotary Youth Exchange certification, which can be suspended for non-compliance.
Withdrawal of recognition of the program	The RI Board	Pilot clause (Document 08, §5.6).

Art. 1.3 - Responsibility in the event of an incident. Operational responsibility lies with the sponsor club (or clubs) and the district. In the school-based model, the school is responsible for day-to-day protocols, under its agreement with the sponsor club. The sponsor club may take out liability insurance in line with local practice.
Rationale: an internal policy cannot remove legal liability, which is determined by local law. This rule sets out who acts, not who is exempted.

Art. 1.4 - A district that does not comply with safeguarding rules. The RI General Secretary may suspend the district's authorization. During the suspension, the RotaKids clubs in that district suspend their activities until the situation is remedied.
Rationale: the sanction applies only to the district concerned, not to the whole program.

Art. 1.5 - A sponsor club that ceases to operate.

1. The district informs the Rotary clubs in the district that there is a RotaKids club without a sponsor.
2. For 180 days, the District RotaKids Chair acts as interim sponsor on behalf of the district.
3. During this period, activities are limited to those supervised by the school; new projects involving travel or public events are suspended.
4. If a new sponsor takes over the club, activities resume normally.
5. If there is no sponsor after 180 days, the authorization is withdrawn. The school may continue its relationship with the district as a Rotary Partner School, without the RotaKids brand.

Rationale: the rule applies the same mechanism and the same time limit, both drawn from the Standard Rotaract Club Constitution.

Chapter 2 - Data management and accounts

Art. 2.1 - Data controller and data processor. Each district is the controller of the data in its instance. The entity that technically operates the platform is the data processor and concludes a

data processing agreement with each participating district. RI does not process data of RotaKids members.

Art. 2.2 - Where each category of data is kept.

Category	Content	Where kept
Public data	The club, the school, the town, the projects, the number of members	rotakids.club, rotakids.net
Children's data on the platform	Alias, club ID, year of joining, Gear of Service level, committee role, the “signed parental consent” tick box	District instance
Children's data outside the platform	Names, parents' details, the signed consent form, the name-alias correspondence, requests to withdraw consent	Local file
Adults' data	Name, email, role, details of the integrity check (no documents)	District instance

Rationale: with no children's names, a compromise of the platform does not expose the identity of any minor. Personal data stays where it was signed.

Art. 2.3 - Accounts.

Person	Account	Functions on the platform
Child	No	Contributes to articles through a temporary link (Art. 5.4).
Parent or guardian	No	The relationship with the club is local.
Rotarian Advisor, Faculty Advisor	Yes	Manages the club, publishes, updates the committee, requests certificates.
Sponsor club contact (president, secretary)	No	Receives notifications; confirms by link (Art. 4.5).
District RotaKids Chair	Yes	Validates adults, certifies clubs, defines the district's fields.
District Governor	Yes	Decides on the withdrawal of authorization.
National coordinator (multinational districts)	Yes	Defines the fields for their country, reviews club files before certification, validates the accounts of adults in their country (Chapter 8).

*Rationale for **having no parent accounts**:* a parent account would link the adult's name to the child and would indirectly bring children's personal data onto the platform.

Art. 2.4 - Vetting of adults.

1. The platform records only: the type of check, who carried it out, the date it was carried out and its expiry date.

2. The document itself (criminal record certificate, other certificate) stays with the district or the sponsor club.
3. An adult account is activated only after validation by the District RotaKids Chair or, in multinational districts, by the national coordinator of the country concerned.
4. 60 days before the check expires, the adult and the District RotaKids Chair are notified. On expiry, the account is suspended until the check is renewed.

Rationale: data on criminal convictions is subject to special rules (GDPR, Art. 10). The district certifies; it does not store.

Art. 2.5 - The RI youth protection course. The "**Protecting Youth Program Participants**" course in the RI Learning Center is **recommended** for every adult with an account. The adult declares in their account that they have taken it, and the date. This information is visible only to the adult and the District RotaKids Chair. The district may make the course mandatory.

Art. 2.6 - Public display of adults. Club websites show only the roles (Rotarian Advisor, Faculty Advisor), without names. Contact is made only through the form (Art. 3.2).

Art. 2.7 - The district's configurable fields.

1. The district adds the fields required by its law or its own policy (for example, D2241: criminal record certificate, certificate of behavioral integrity).
2. Permitted types: tick box, date, list of options, short text. File uploads are not permitted.
3. Fields may be added for adults and for clubs. No fields may be added for children.
4. A field may be marked as mandatory (it blocks account activation) or as expiring (Art. 2.4, item 4 applies).
5. Fields are defined per district + country pair (Chapter 8).

Rationale: the platform contains no national legal rules. Each district applies the law of its country and is responsible for doing so. The ban on fields for children preserves the principle in Art. 2.2.

Chapter 3 - Protection of minors on the platform

Art. 3.1 - Incident reporting.

1. Any allegation or suspicion of abuse or harassment is reported immediately to the local authorities, in accordance with local law.
2. Within 24 hours, it is reported to the district Youth Protection Officer and the District Governor.
3. Within 72 hours, it is reported to RI, through RI's youth protection reporting procedure.
4. The platform does not store incident reports.

Rationale: the Rotary Code of Policies requires all allegations of abuse or harassment to be reported to RI within 72 hours. This rule is aligned with it and replaces the note in Document 07, §5 (Chapter 12).

Art. 3.2 - Public contact. The contact form on the club website is addressed only to the Rotarian Advisor / Faculty Advisor. Roles held by children (president, secretary, etc.) do not appear as recipients.
Rationale: a form addressed to a child would publicly signal that the child can be contacted.

Art. 3.3 - Parental consent for images and names. The consent form signed on enrollment contains the following options:

- group photos;
- individual portrait;
- no public photos (applies by default if nothing is ticked);
- publication of the first name.

The consent is valid from enrollment until it is withdrawn. The selected options exist only on the paper form, in the local file.

Art. 3.4 - Publishing.

1. Only a responsible adult may publish.
2. Each time they publish, the adult must tick the declaration: *"I have checked the consent forms of the children identifiable in the images and I confirm that the images and any first names of children appear in accordance with the options ticked by the parents."*
3. Responsibility for the published content lies with the adult who publishes it.
4. The platform keeps an internal log (who published what and when), which the District RotaKids Chair can access at any time.
5. The platform does not automatically check the content of images and does not use facial recognition.

Rationale: facial recognition would mean processing minors' biometric data. Individual responsibility, documented by the log, is sufficient and proportionate.

Art. 3.5 - Withdrawal of consent.

1. The parent submits a written, signed request to the RotaKids club, to the responsible adult, where the original consent was signed.
2. From the moment the request is received, no new images of the child are published.
3. The responsible adult updates the record on the platform and removes images already published within 30 days at most.
4. The request is kept in the local file, alongside the original consent.

5. The request is not subject to approval; it is recorded.

Rationale: withdrawing consent must be as easy as giving it (GDPR, Art. 7(3)). Submitting it in the same place and in the same form respects this symmetry.

Art. 3.6 - Removal of a specific image. Every public image has a "Request image removal" button. The image is hidden immediately, and the responsible adult reviews the request afterwards.

Art. 3.7 - Image metadata. On upload, the platform removes all metadata, including GPS coordinates, and does not keep the original file (technical specification in Art. 11.4).
Rationale: photos taken with a phone may contain the location where they were taken.

Art. 3.8 – Supervision of activities

1. No adult is left alone with a child.
2. In the community-based model, at least two vetted adults are present at every activity (Document 07, §3B).
3. In the school-based model, the school's rules apply, subject to item 1.
4. The district or national law may require the presence of two adults in the school-based model as well.

Rationale: RI requires adults to avoid unsupervised one-on-one contact with young people. The two-adult rule is an additional requirement, applicable under Art. 1.1.

Chapter 4 - Club life cycle

Art. 4.1 - Chartering. On chartering, the club receives a new club **ID**. **An ID is never reused** or reactivated, not even for a reactivated club.
Rationale: a unique ID prevents the histories of two different clubs from being mixed.

Art. 4.2 - Annual update window. Between May 1 and July 31, the responsible adult updates the following on the platform:

1. the RotaKids committee for the next Rotary year (aliases and roles);
2. the responsible adults: each one is reconfirmed ("stays on next year") or replaced;
3. the sponsor club's contact details for the new Rotary year: the name and email of the president and of the secretary.

A club that has completed its update is considered active. The update cannot be saved if an adult (new or reconfirmed) has an expired integrity check.
Rationale: the annual change of committee is needed anyway (for example, for the president's certificate), so the same operation confirms that the club is operating. Reconfirming the adults checks that the responsible adult is still present.

Art. 4.3 - The July 1 transition. On July 1 at 00:00 (the district's local time), the committee and adults entered for the new year become active and the previous ones move to the history. Messages from the contact form are automatically redirected to the new office holders.

Art. 4.4 - Failure to update.

Date	Action
May 1	Notice to the responsible adults that the window has opened
June 15, July 15	Reminder to the responsible adults
July 31	Notice to the responsible adults and to the president of the sponsor club, with an endorsement link
August 31	Notice to the District RotaKids Chair

Art. 4.5 - Endorsement by the sponsor club. The president of the sponsor club may confirm, through a unique link received by email and without an account, that the RotaKids club is operating even though it has not been updated. The endorsement:

1. is valid until the next update window (at most 1 year);
2. does not cover an adult with an expired integrity check;
3. transfers responsibility for the club's status to the sponsor club.

Art. 4.6 - A second year without an update. If the update is not made in the following period either, the District RotaKids Chair proposes to the Governor that the authorization be withdrawn, and the Governor decides.

Art. 4.7 - Closed club.

1. The club's website switches to archive mode (read-only) at the permanent address *rotakids.club/{club ID}*.
2. The slug (for example */pitesti*) is released. Until another club takes it, it redirects to the archive.
3. When a new club takes the slug, its page shows a reference to the archive of the previous club with the same name.
4. The club's own domain is no longer served by the platform after 90 days. The decision on the domain rests with the sponsor club.

Rationale: the children's projects remain available and old links (press, social media) are not lost. Releasing the slug allows a future club to use the name.

Chapter 5 - Club websites and children's contributions

Art. 5.1 - Website address. Each club automatically has two addresses:

1. *rotakids.club/{slug}* - the club's name, allocated in order of request; where names coincide, the town or state is added (for example */springfield-il*);
2. *rotakids.club/{club ID}* - the permanent address, which redirects to the slug while the club is active.

Art. 5.2 - Own domain. A club may use its own domain (for example *rotakidspitesti.ro* or *rk-evanston.org* etc.), without the www prefix.

1. The club buys the domain from the national registrar.
2. The club sets up at the registrar the DNS records indicated by the platform (Art. 11.1).
3. The responsible adult enters the domain in *my.rotakids.org*.
4. The own domain becomes the primary address; *rotakids.club/{slug}* and www. redirect permanently (301) to it.

Rationale: a single canonical address avoids duplicate content and preserves the club's local identity.

Art. 5.3 - Website structure. The header (the official logo) and the footer (safeguarding information and contact) are fixed and identical for all clubs. The page content is built from predefined blocks: about the club, projects, gallery, history, contact, etc. Projects are articles (text and images) and are not registered separately on the platform.
Rationale: the visual identity stays compliant with the brand guide, whoever edits the site.

Art. 5.4 - Children's contributions through a temporary link.

1. The responsible adult creates a new article and generates a contribution link.
2. The adult sets the link's validity: 24 hours by default, 7 days at most.
3. The children open the link without an account, write the text and upload images: at most 10 images, of at most 10 MB each.
4. The contribution is saved only as a draft. Nothing becomes public through the link.
5. The adult signs in, reviews the draft, may select the images, may edit the text and then save the draft, publish it or delete the article (deletion requires confirmation).
6. If the link circulates outside the club, the adult closes it from their account.

Rationale: the children write about their projects themselves, without having accounts. Control over publication stays with the adult.

Art. 5.5 - What is not published is deleted. Images that are not selected are deleted on publication. Unpublished drafts are deleted automatically after 30 days.
Rationale: data minimization; the platform does not keep unpublished material.

Art. 5.6 - Email relay.

1. A visitor's message sent through the form is saved in the club's inbox and forwarded to the personal email of the recipient adult.
2. The displayed sender is the club, and the adult's personal address is not visible to the visitor.
3. The adult can reply directly from their email application; the platform verifies the sender, archives the reply and sends it to the visitor on behalf of the club.
4. The conversation history stays with the club and passes to the new office holders on July 1.

Rationale: no personal address is published, and the club's communication is not lost when people change.

Chapter 6 - Recognition and certificates

Art. 6.1 - The District RotaKids Citation. The Citation may be awarded only to clubs that meet at least 5 of the 7 objectives in the Global Handbook, §9. Completing the three annual projects (local, regional or national, international) is one of the 7 objectives. The fundraising project (objective 7) is reported on the club's website. The district may adapt the criteria, with the approval of the Governor or the District RotaKids Chair. There are no restrictions on clubs collaborating on projects. The district assesses clubs on the basis of the projects section of their website.
Rationale: projects are not registered in a structured way on the platform (Art. 5.3), so the assessment is made by the district, in accordance with Statement of Policy 13.090.

Art. 6.2 - The Jane Mills Award. A district award - the recipient or recipients are chosen by the District RotaKids Chair, with the consent of the Governor. The criteria and the manner of awarding are to be set later by each district.
Rationale: The award bears the name of Rotarian Jane Mills (Rotary Club of Stuart, Florida), a teacher, founder of the first RotaKids club (September 2000) and, for more than a decade, RotaKids Chair of District 6930.

Art. 6.3 - The child's certificates.
These provisions apply to all certificates issued to children: level, graduation, Master of the Gear, office.

1. The responsible adult requests the certificate on the platform for the child's alias.
2. The platform generates a preprinted PDF showing: the district, the RotaKids club, the school, the sponsor club, and the verification series and number (Art. 6.5).
3. The child's name, the period and the level achieved are filled in by hand, at the club.
4. The certificate is signed by the responsible adult and by the president of the sponsor club.

5. The child's alias does not appear on the certificate.

Rationale: the platform does not know the child's name. The alias is left off the certificate because the certificate may be photographed and published; name and alias together would publicly link the child to their history on the platform.

Art. 6.4 - The adult's certificate of participation. The platform issues a certificate of participation for the Rotarian Advisor or Faculty Advisor, with their printed name, role and period, and a verification series and number. The certificate is signed by the Governor or by the District RotaKids Chair. It attests participation only; any professional recognition (for example by school authorities) is negotiated locally by the district.

Art. 6.5 - Certificate verification.

1. The series is the district number at the date of issue (for example D2241).
2. The number is a random code of 8 characters followed by 1 check character (for example K7QM4RXTJ), unrelated to the alias or to the database ID.
3. The series and number are entered at *rotakids.org/verify*; the certificate also carries a QR code that fills them in automatically.
4. The page shows only: the status (valid, canceled, non-existent), the date of issue, the club, the sponsor club, the district and the level recorded at issue.
5. The page never shows the name or the alias.
6. The series remains the one at issue even if the district is later renumbered or reorganized.

Rationale: verification confirms the authenticity of the document, not the identity of its holder. Showing the recorded level makes any handwritten change on the certificate visible. The code specification is in Art. 11.2.

Art. 6.6 - The Gear of Service badge. The badge has three levels: **TO BE** (solid wheel), **TO DO** (spoked wheel), **TO MULTIPLY** (gear wheel). The badge contains no Rotary Marks and must not resemble the Rotary emblem: a number of spokes other than 6, a number of teeth other than 24, no keyway in the center, in turquoise or white, not gold and royal blue. Within these rules, the badge may be produced freely, including by the children themselves (for example, from cardboard). **Gear of Service** is the program's progression system (Statement of Policy 13.050). For existing clubs, including those in the network developed by RIBI, introducing it is an addition to their current activity, not a change to their structures.

Rationale: products bearing Rotary Marks may be made only by RI licensed vendors (Rotary Brand Center; RI Code of Policies, provisions on the licensing of Rotary Marks). A badge without Rotary Marks does not fall under this rule.

Art. 6.7 - Requested exception for materials bearing the logo. The RI Board is asked to grant the following exception: badges, certificates and materials bearing the official RotaKids logo, produced by clubs or sponsors for their own members, free of charge and not for sale, may be made locally without a licensed vendor, in accordance with the RotaKids visual guide. Materials that are sold or distributed for promotional purposes remain subject to the usual RI licensing rules.

Art. 6.8 – District RotaKids Fellow.

1. A district distinction (for example "D2241 RotaKids Fellow"), awarded to individuals or organizations that donate to RotaKids projects, in money or in goods.
2. The value thresholds and any grades are set by each district, in the national currency.
3. The donation is entered in the accounts of the sponsor club, which confirms it to the district.
4. The distinction is awarded by the District RotaKids Chair, with the consent of the Governor.
5. The certificate has a verification series and number (Art. 6.5).

Rationale: thresholds differ between countries; a distinction with district thresholds is fair only if it is a district distinction too.

Chapter 7 - Financial arrangements

Art. 7.1 - Dues. Children pay no dues and are not asked for any financial contribution (Standard Constitution, Art. 8; Bylaws, Art. 7.1).

Art. 7.2 - Club funds.

1. Small amounts (for example from fundraising activities) are kept in the club's cash box, at the school, under the responsibility of the responsible adult.
2. Large amounts and donations are managed through the account of the sponsoring Rotary club and are entered in its accounts.
3. The amounts referred to in items 1 and 2 are set by the District RotaKids Chair, with the consent of the Governor.
4. The club's annual financial statement is prepared on paper and kept in the local file.
5. The platform keeps no financial records.

Art. 7.3 - Uniforms and protocol materials. Funding for uniforms and the protocol kit is decided locally, by the sponsor club and the district. The platform does not generate expense claims.

Art. 7.4 - Project support on *rotakids.com*. The module is optional. Each club decides whether to activate it and in what form: donations in money, donations of goods, or both.

Art. 7.5 - Donations in money.

1. The project page shows the target, the amount raised (updated by the responsible adult) and the sponsor club's donation details: the bank account or a link to the sponsor club's donation page.
2. The donor pays the sponsor club directly.
3. The platform does not process payments.
4. The money donation module is activated only if the sponsor club is a legal entity and has a dedicated bank account. The responsible adult confirms these conditions on activation; responsibility lies with the sponsor club.

Rationale: a platform that processes payments become a payment service provider, with obligations for customer checks, disputes and tax receipts in every country. Displaying the donation details produces the same result without those obligations.

Art. 7.6 - Donations of goods.

1. The responsible adult publishes the list of materials needed for the project.
2. The donor buys and ships the item only to an institutional address: the school office or the sponsor club's premises. Delivery to the address of a child or a parent is not permitted.
3. The responsible adult marks the item as received.
4. Vouchers with a monetary value are not entered on the platform; they are donated directly to the sponsor club.

Art. 7.7 - Local restrictions. The club may activate the option “accept donations only from my country” if local law restricts donations from abroad. Compliance with local rules on collections and donations rests with the sponsor club.

Rationale: some national laws (for example the FCRA in India) also apply to goods received from abroad, not only to money.

Chapter 8 - Jurisdictions and multinational districts

Art. 8.1 - Country and district. The country and the district are separate attributes of the club.

1. The country is given by the place where the club operates and does not change.
2. The district has an internal ID on the platform. The district's Rotary number (for example 2241) is an attribute with a start date and an end date.
3. A club's membership of a district is kept as history (for example: club 1234 in D2241 from 2014 to 2031).

Rationale: Rotary districts merge, split and are renumbered. Separating the two attributes allows reorganizations without loss of history.

Art. 8.2 - Field sets. The configurable fields (Art. 2.7) are defined per district + country pair. A club sees the set corresponding to its current district and its country.

Art. 8.3 - The national coordinator. In a multinational district, the Governor appoints a national RotaKids coordinator for each country. The coordinator defines the field set for their country, reviews the files of clubs in that country before certification and validates the accounts of adults in that country.
Rationale: validation must be carried out by someone who knows the legislation of the country concerned.

Art. 8.4 - Reorganization of districts.

Event	Effect on the platform
The district receives clubs from a new country	Existing clubs are unchanged. The coordinator for the new country defines its own field set.
The district loses a country	The clubs in that country move to the new district, with their history preserved. The old set remains in the archive, read-only.
Two districts merge	The new district receives a new ID and defines its own field set. The old sets remain in the archive, read-only.
A district splits	Each new district receives a new ID and defines its own field set. The old set remains in the archive, read-only.
The district is renumbered	The internal ID stays the same; only the number attribute changes.

Art. 8.5 - Grace period. When a new mandatory field appears after a reorganization, adults have 180 days to complete it. The account is not suspended during this period. Data in the old fields remains in the history.

Art. 8.6 - Legal assessment before launch. Before the platform is launched in a new jurisdiction, the data processor and the district concerned review at least:

1. the rules on online contributions by children under 13 (for example COPPA in the US), for the contribution link (Art. 5.4);
2. the obligations of the platform operator if illegal content is uploaded;
3. local rules on collections and donations (Art. 7.7);
4. the vetting requirements for adults working with children.

Rationale: this document makes no legal statements country by country. The outcome of the review is reflected in the field set and in the district's settings.

Chapter 9 - Moving on to Interact

Art. 9.1 - Admission rule. Admission to Interact follows the bylaws of the Interact club receiving the candidate. RotaKids membership does not confer an automatic right of admission.
Rationale: each Interact club adopts its own bylaws, which are approved by the sponsoring Rotary club (Standard Interact Club Constitution). Neither RI nor the RotaKids program can directly set the admission rules of another program.

Art. 9.2 - Model clause for RotaKids graduates. The following clause is made available to Interact clubs for inclusion in their bylaws:
"RotaKids graduates who have completed at least one Gear of Service level may be admitted: (A) directly, without a vote; or (B) by vote, without a prospective member period; or (C) by vote, with a prospective member period reduced to [X] days/months."

Art. 9.3 - District policy. The district may adopt, normally at the district assembly, a policy recommending that all Interact clubs in the district include the clause, in a single variant (A, B or C). The policy is applied through the sponsoring Rotary clubs, which approve the Interact bylaws.
Rationale: a child who moves to another town in the same district benefits from the same rule. The mechanism encourages rather than obliges, like the proposal in Resolution 26R-06 on moving from Rotaract to Rotary.

Art. 9.4 - Candidates from another district or another country. The rules of the district receiving the candidate apply. The Interact club checks the candidate's RotaKids record at *rotakids.org/verify*, on the basis of the certificate (Art. 6.5).

Art. 9.5 - Moving-up ceremony. The sponsoring Rotary club is encouraged to hold a graduation ceremony and to make the connection with an Interact club. Members who have completed level III receive the mention "Master of the Gear" on their certificate.

Chapter 10 - Administration of the platform during the pilot

Art. 10.1 - Duration. A 3-year pilot from the decision of the RI Board is proposed. The Board may withdraw recognition at the end of the pilot if the criteria in Document 08, §5.6, are not met.

Art. 10.2 - The data processor. During the pilot, the platform is operated by District 2241, through the legal entity the district designates. Development and technical operation are provided by Adrian Stan (Rotary Club of Pitești), on behalf of the district.

Art. 10.3 - Agreements with districts. District 2241 concludes a data processing agreement with each participating district, under which the participating district remains the controller of its data (Art. 2.1).

Art. 10.4 - Infrastructure accounts. Hosting accounts, domains and DNS will be held by District 2241, not by an individual.

Art. 10.5 - Source code. The source code is kept in a private repository owned by District 2241, together with the installation and operating documentation. The code is not published.
Rationale: publishing the code would make it easier for third parties to find potential vulnerabilities.

Art. 10.6 - Emergency access. The access credentials for the infrastructure and the repository are deposited in a sealed envelope with the Governor of District 2241 or with the District RotaKids Chair. The envelope is updated whenever the credentials change.
Rationale: ensures continuity if the technical operator can no longer act.

Art. 10.7 - Transfer to RI. At the end of the pilot, District 2241 undertakes to transfer to RI, free of charge: the domains *rotakids.org, rotakids.net, rotakids.com, rotakids.club, rotarykids.org, rotarykids.net* and *rotarykids.com*; the repository with the source code and documentation; the infrastructure accounts. The subsequent mode of operation is decided by RI. The data remains the districts' property.

Art. 10.8 - Costs.

Category	Nature	Coverage during the pilot
Infrastructure (hosting, CDN)	Small, proportional to use	Proposal: supported by D2241
Development	Volunteer work	Proposal: Adrian Stan
Operation and support	Volunteer work	Proposal: Adrian Stan
Compliance (legal assessment per jurisdiction, security audit)	Variable	District 2241 and the joining district - new jurisdiction (Art. 8.6)

RI bears no costs during the pilot.

Chapter 11 - Technical specifications

Art. 11.1 - Own domains.

1. The primary address is the domain without www (for example *rk-evanston.org*).

2. The club sets up at the *registrar* A (IPv4) and AAAA (IPv6) records pointing to the platform's fixed IP addresses. A CNAME record cannot be used on the domain without www (a limitation of the DNS standard).
3. *www.{domain}* redirects permanently (301) to the domain without www.
4. *rotakids.club/{slug}* redirects permanently (301) to the own domain.
5. The platform recognises the domain from the HTTP request and serves the club's website.
6. The platform's IP addresses are stable anycast addresses and do not change without 12 months' notice to clubs with their own domain.

Art. 11.2 - Certificate verification code.

Parameter	Value
Alphabet	32 symbols: the letters A-Z without I and O (24) and the digits 2-9 (8)
Length	8 random characters + 1 check character
Check character	Calculated from the first 8 characters (Luhn mod 32 algorithm)
Generation	Cryptographic random number generator; the code is not derived from the alias or the ID
Uniqueness	Global, across the whole platform
Entry	No hyphens; lower-case letters are accepted
Excluded character entered (I, O, 0, 1)	Explicit message: “the character X is not used in codes”
Wrong check character	Message: “code entered incorrectly”, distinct from “certificate does not exist”
Rate limiting	Maximum number of queries per hour per IP address

The code space is approximately 10^{12} combinations.

Art. 11.3 - Contribution link.

1. Form: *rotakids.club/{slug}/contribution/{token}*; on an own domain: *{domain}/contribution/{token}*.
2. The token has at least 128 random bits and is stored on the server only as a hash.
3. The link expires on the date set by the adult (24 hours by default, 7 days at most) and can be closed at any time.
4. Limits: at most 10 images, of at most 10 MB each.
5. Images go through the pipeline in Art. 11.4 right from upload.

Art. 11.4 - Image processing pipeline.

1. Automatic rotation according to the orientation recorded by the camera.
2. Removal of metadata (EXIF, XMP, IPTC), including GPS coordinates.
3. Resizing to display dimensions.

4. Conversion to JPEG or WebP (including from HEIC).
5. The original file is not kept.
6. On every deployment, an automated test runs a sample image with GPS coordinates through the pipeline and checks that the result no longer contains metadata.

Rationale for the order: if metadata is removed before rotation, the orientation information is lost and the image may appear upside down or sideways.

Art. 11.5 - Internal log. For each publication and deletion, the platform records: the account, the date and time, and the object affected. The log is accessible to the District RotaKids Chair.

Chapter 12 - Alignment with documents 01-10: required amendments

For the consistency of the package, the following provisions of the earlier documents (01-10) are proposed for amendment.

Document	Current provision	Amendment	Basis
07 Safeguarding, §5	RI receives only annual statistical reports, not case details	Reporting to RI within 72 hours for any allegation of abuse or harassment	Art. 3.1
07 Safeguarding, §3B	Responsibility in the community-based model lies “solely” with the sponsor club	Responsibility lies with the sponsor club and the district	Art. 1.3
07 Safeguarding, §4	Photos are published with written parental consent, on standard templates	The consent template contains the four options; procedure for withdrawing consent	Art. 3.3, Art. 3.5
07 Safeguarding, §4	Members' data stays in the district's or the school's records	Clarification: the platform does not contain children's names; names stay in the local file	Art. 2.2
03 Statement of Policy, 13.080.3	Direct eligibility possible, at the discretion of the receiving Interact club	Compatible; the model clause and the district policy are added	Chapter 9
05 Global Handbook, §8 and §10	Direct eligibility for Interact on graduation, without the reservation in 13.080	Alignment with 13.080; the model clause and the district policy are added	Chapter 9
06 Branding, §1a; 09 Annex A, §3; 08 Position Paper, §3B	Turquoise is “unique” or “exclusive” to RotaKids within the Rotary family	Turquoise is part of the official Rotary palette and is proposed as the RotaKids identifying color	Rotary Brand Center

Document	Current provision	Amendment	Basis
06 Branding, §3	The badge may be produced locally	The badge contains no Rotary Marks and follows the design rules; exception requested for materials bearing the logo	Art. 6.6, Art. 6.7
08 Position Paper, §1	Infrastructure “fully operational”, “zero cost to RI”	Existing infrastructure, offered free of charge; RI bears no costs during the pilot	Art. 10.8
Resolution Worksheet	“No financial impact on RI”	“No RI dues, staff or budget requested; the level of support is decided by the Board”	RI financial note on 26R-11
04 Sponsor Guide, §6	*rotakids.com* - fundraising prototype	*rotakids.com* does not process payments; it only displays the sponsor club's donation details	Art. 7.5
08 Position Paper, §5.3	RIBI clubs need not change their operations	Existing clubs keep their structures; Gear of Service is added to their activity, in accordance with 13.050	Art. 6.6
09 Annex A, §5.2	The official Rotary wheel is at the center of the badge	The level wheel (solid, spoked, gear) is at the center of the badge, without Rotary Marks	Art. 6.6
05 Global Handbook, §9, objective 7	The fundraising project is reported on *rotakids.com*	It is reported on the club's website	Art. 6.1, Art. 7.4
05 Global Handbook, §11	The club website is a subdomain (for example *pitesti.rotakids.club*)	The club website has the address *rotakids.club/{slug}* or its own domain	Art. 5.1, Art. 5.2
05 Global Handbook, §11	A club with no activity for 24 months becomes a “Legacy Club” (gray pin)	The life cycle applies: the annual update window, endorsement by the sponsor club and the Governor's decision	Chapter 4
09 Annex A, §7	The certificates are numbered as Documents 11–26	The templates have not been drawn up; they are established after RotaKids is recognized by the RI Board	Art. 1.2

Document	Current provision	Amendment	Basis
09 Annex A, §7 (Document 17)	RotaKids Fellow, a global distinction	District RotaKids Fellow, a district distinction	Art. 6.8
03 Statement of Policy, 13.040.4; 09 Annex A, §2.5; rotakids.net	The heritage logo was created by RIBI	The heritage logo was designed by Steve Hall (RC Merritt Island, D6930) for the founding club in Florida and was adopted by RIBI	Art. 1.2
